### ◆ SKILLS ◆

### PROFESSIONAL SUMMARY

Results-oriented Full Stack Developer with 3+ years of experience specializing in mobile application development using React Native, ReactJS and backend services with Node.js. Demonstrated expertise in architecting and implementing robust solutions, integrating complex features, and ensuring high code scalability. Proficient in developing both frontend interfaces and backend systems simultaneously, ensuring cohesive and functional applications. Continuously exploring new technologies and methodologies to drive innovation and efficiency in both mobile and web development.

### EMPLOYMENT HISTORY

#### Full Stack Developer (Remote)

Freelancer | Aug 2024 - Present

##### Chat Lynk[React Native, TypeScript, JavaScript]

Optimized app performance by implementing advanced caching and leveraging Redux for efficient state management. Integrated real-time notifications via WebSocket, enhancing responsiveness and significantly improving speed over the previous version.

#### Full Stack Developer (Remote)

@Buzzart Software Pvt Ltd | Aug 2022 - Aug 2024

##### Samaj APP [React Native, TypeScript, NodeJS, JavaScript]

- Led the development of mobile applications for a diverse range of clients, specializing in React Native and Node.js.
- Deployed frontend on Firebase & backend on AWS, ensuring high availability and scalability.
- Utilized Firebase for real-time data handling, implemented JWT for secure user authentication, and employed Cloudinary for media management[Images].
- Integrated Razorpay for smooth and secure payment processing within the app.
- Maintained high code quality through rigorous testing and code reviews, ensuring robust and maintainable codebase.
- Utilized Redis for efficient data caching, improving app performance and scalability.
- Collaborated closely with cross-functional remote teams to architect scalable solutions and meet project deadlines.

##### Samaj App Web & Diverso Web [NextJS, TypeScript, JavaScript]

I developed the companion website for a matrimonial app, including a link to download the app, and independently built the company website for Diverso. I have experience working on multiple websites, showcasing expertise in delivering app and web development solutions across various industries.

##### Web FE Development [React Native, ReactJS, JavaScript]

- Developed the frontend of a gaming platform for enthusiasts.
- Emphasized player connections, match facilitation, and event organization.
- Designed a user-friendly interface with real-time communication features.
- Implemented robust security measures.
- Integrated scoring systems and leaderboards to enhance competitiveness.
- Continually adapted features to meet community needs.
- Provided players with an engaging and organized gaming experience.
